Gentlemen:

Please furnish this office the following articles subject to the terms and conditions contained herein:

Place of Delivery: **TARLAC STATE UNIVERSITY**

Date of Delivery:

Delivery Term:	30 Calendar Days
Payment Term:	0/30

Item No.	Unit	Description	Quantity	Unit Cost	Total Cost
1	lot	**LaaS platform products:** **1. LaaS platform Open edX Platform for Learning and Course Marketplace** The LaaS platform provider has worked and partnered with Microsoft to offer, deploy and deliver a fully functional end-to-end Course Content Management System (edX Studio) which lets companies and Course Team Members to build courses – to create course structure, add course content, including videos, problems and other resources for learners, this Suite will also include a full on Learning Management Systems (LMS); it is the Open edX tool that is used by learners, students and trainees to access course content, including videos, textbooks, and problems to check their progress in the course. For Course Team Members, the LaaS platform's Open edX LMS includes an Instructor Dashboard with options to enroll learners, produce reports and administer a course as it runs. LaaS platform Open edX Platform LMS Platform will already be Microsoft Course Content-Ready. **2. Cloud Labs for Training (PRACTICE LABS) and Hands-On Assessments (GRADED LABS)** LaaS platform's Cloud Labs empowers to create and provide Hands-On Learning Experience for Tech and IT related courses. Your learners and students can take and learn IT / Technical courses with PRACTICE LABS and to be able to provide a standard within the organization through measurable Tech Evaluations and Post-Training Assessments by utilizing the GRADED LABS. **Requirement Specification:** 1. Purpose This tender is for a 1-year contract to Supply, Setup, Commission, Host, Support and Maintain a Learning as a Service (LaaS) platform to be operational within 4 weeks after the issuance of Letter of Acceptance (LOA). The platform will host online course content from Microsoft as well as other course content created using the Open Learning XML (OLX) format. The platform will also support certification exams created by Microsoft and others by the provider. 2. Background A training program to be offered by Tarlac State University requires an online learning platform for hosting and maintaining online course content created by Microsoft or other course content created using the Open Learning XML (OLX) format. The online learning platform is also required to support certification exams created by Microsoft. The online learning platform must be hosted on the cloud and be configurable and administered by a local system administrator. The online learning platform will afford users of the training program access to the online course content as well as the ability to undertake certification exams on the platform. **Business and Functional Requirements** 1. The LaaS platform must be Open edX and it must be hosted on a cloud-based platform. 2. The successful provider must be a Microsoft LaaS partner or a reseller of a Microsoft LaaS partner. 3. The successful provider must undertake a one-time setup of the LaaS on the cloud-based platform. Setup includes but is not limited to 1. installing and configuring Open edX on the cloud-based platform, which includes but is not limited to 1. provisioning for Microsoft certification exam questions created by or curated from Microsoft to be administered on the LaaS 2. provisioning for MS certification exam results / status to be recorded or updated to Microsoft's Achievement Site.			

In case of failure to make full delivery within the time specified above, a penalty of one-tenth (1/10) of one percent for every day of delay shall be imposed.

Very truly yours,
